PROJECTS

Online Dictionary System. Developed a client-side application that allows users to search, add, update, and delete words and their meanings. The system follows a clean MVC architecture, using Spring Boot for backend logic. It was built during an internship at Softpro India and reflects practical exposure to Java-based software development

Personal Portfolio Website. Designed and developed a responsive personal portfolio website to showcase academic achievements, projects, technical skills, and links to GitHub, LinkedIn, and LeetCode. The site features smooth navigation, clean aesthetics, and is fully mobile-optimized.

Task Management Application. Built a web-based task manager to help users organize their daily activities. Includes features like task creation, editing, deletion, and marking tasks as completed. Focused on clean UI/UX, local storage handling, and user-friendly design.
